

Towhid Ahmed

 +8801871834635  towhid4635@gmail.com  LinkedIn  Github  LeetCode  GFG

SUMMARY

Highly motivated Software Engineer with strong problem-solving skills, backed by solving 500+ DSA problems across LeetCode and GFG and active participation in Codeforces contests. Skilled in Core Java, Python, OOP Database, OS, Networking, and Low-Level Design. Experienced in building real-world ML and DL projects and deploying AI-driven applications using FastAPI and modern tools.

Technical SKILLS

- Programming: Java, Python
- Backend & API: FastAPI and REST API
- Core CS: Data Structures & Algorithms, OOP, SQL, Operating Systems, Database Management, Computer Networking
- ML/DL: Supervised, Unsupervised, Scikit-learn, CNN, ANN, RNN, TensorFlow, Keras
- Tools & Platforms: Git, GitHub, Linux, VS Code, Jupyter Notebook
- Low Level Design: SOLID Principles, Singleton, Factory, Strategy, Observer, Decorator, Adapter
- Other: Problem Solving, System Design Basics

PROJECTS

Movie Recommendation System [GitHub Link](#)

- Built a recommendation system using collaborative and content-based filtering.
- Delivered personalized suggestions across similar genres and user behaviors.
- Implemented FastAPI backend and Streamlit frontend for interactive user experience.

Face Mask Detection (CNN) [GitHub Link](#)

- Developed a convolutional neural network to detect face masks in real-time images.
- Implemented real-time prediction and visualized training/validation performance.
- Achieved 92.19% accuracy, demonstrating practical application of computer vision techniques.

Customer Churn Prediction (DL) [GitHub Link](#)

- Built a binary classification model using TensorFlow/Keras to predict customer churn based on demographics and account information.
- Performed data preprocessing, feature encoding, scaling, and train-test splitting
- Achieved 79.33% test accuracy and visualized model performance using confusion matrix and classification metrics.

Breast Cancer Classification [GitHub Link](#)

- Created a neural network using TensorFlow/Keras to classify tumors as benign or malignant.
- Conducted data preprocessing and feature scaling for model training.
- Achieved 94.35% test accuracy and visualized training/validation performance for evaluation.

EDUCATION

Bachelor of Business Administration (Honours) – Management
NagirHat College, Chittagong Bangladesh 2nd Year (Ongoing), Expected Graduation: 2028
Self-Taught Software Engineer

ACHIEVEMENTS

- Solved 500+ DSA problems (LeetCode + GFG)
- Built top ML/DL projects including CNN and ANN models
- Self-taught technical skills while pursuing a non-CS degree.
